

To the person with the ability to let RIGHT happen:
I have XM Radio and love it for all it gives to me. I travel this country extensively and find it extremely valuable. I am upset that someone is attempting to screw up this valuable travel tool and wish to go on record as wanting NAB 04-160 to be rejected.

Think about it, try traveling across this country and keep one station functioning the total miles. Also how is one to drive and search constantly for a station that gives me the traffic and weather of the region I happen to be driving through at the time.

Please don't allow some damn fool people to mess up something extremely good. I do pay for the privilege of having this valuable tool.

Thanks for listening and please, please don't let it happen.

Donna Frasier
